REFERENCE COPY

1. A train travelling in the direction of BORISOV (28°31' E/54°12' N) via BOR (presumably BOBR (29°31' E/54°20' N) passed a fuel dump about 2,000 feet wide, just east of the BOR railroad station. There was an improvised airfield about two miles beyond this point. Both installations were located between the railroad line and a highway which paralleled the line at a distance of about 1,650 feet.

2. Numerous piles of 55-gallon barrels, and seven or eight tanks, each of about 4,000 gallon capacity, were seen.

25X1X 3. The twenty IL-4s were standing on 3,300x1,650 foot field. The only installations seen were a few tents.

25X1A Comment:

Report is believed to be on the previously reported PRIYAMINO fuel dump and improvised airfield. Identification of the planes as IL-4s is tentatively accepted.

25X1X

25X1X

As twin-engine aircraft have frequently been observed at the field, the occupation can still be assumed to be about one regiment of bombers.
